### MINIMUM REQUIREMENTS

Applicants must have completed all requirements for Ph.D. in Agricultural Engineering or closely related field in engineering by the date of hire. Must have excellent written and verbal communication skills in Spanish and/or English. Must submit evidence of peer-reviewed publications and demonstrate the potential to establish and maintain a productive research program.

---

### JOB DESCRIPTION AND DUTIES

Tenure-track position at the rank of Assistant Professor in the areas of agricultural production in either controlled environments, precision agriculture and/or alternative energy sources. The candidate must develop an externally funded research program in the areas described above. In addition, the candidate is expected to have a clear commitment to teaching at the undergraduate and graduate level, developing courses in his/her area of specialization.

The selected candidate must establish and maintain a productive research program, teach courses at the undergraduate and graduate level in his/her area of expertise, and perform outreach in the agricultural extension program. Must have the ability to work effectively as a member of a team.

---

### HOW TO APPLY

Candidates interested in this position should send a letter of intent that includes a statement of research interests, official academic transcript of all university degrees, curriculum vitae, including a record of publications, and three (3) letters of reference to:
